

Data Category Module Definition

Name: Trimed

Namespace: <http://www.trimed.org/ns/sample>¹

Description: The Trimed Module is a data category module collecting data categories selected from 1) DatCatInfo (<http://www.datcatinfo.net/#/>) with their associated unique permanent ID (PID) and 2) TriMED Data Category Repository (*to be defined*). In this document, the data categories associated to the TriMED DCR are underlined in gray and need to be filled with the associated URL(s).

Data Categories:

Identifier	PID	Classification	Value(s)	Level (TMF)
